

# Metin Süt

Software Developer

Istanbul / Turkey  
20 July 1987  
**+90 (542) 437-40-27**  
[metindir@gmail.com](mailto:metindir@gmail.com)

I am a software developer with more than five years of experience building complex web apps, specializing in frontend development.

## EXPERIENCES

### Borda Technology

July 2021 - Dec 2022 / İstanbul --- Frontend Developer / React

Borda is a company that makes healthcare solutions. Its main focus is on making things like patient safety and asset management.

My team is currently working on a project about managing assets.

I add new components to the design system. I helped the repo from monolith to monorepo with turborepo. I added a library that can be used for other projects. I gave information to my colleagues about tailwind CSS and we added it to the project. I suggested a migration from redux to react-query for better usage and useful concepts. I've built a web app with a web socket for observing hardware devices.

### Comeon Group

April 2019 - May 2021 / İstanbul --- Frontend Developer / React

Comeon is an online casino and bet platform. I was working in the casino domain, we were listing games by categories and we were launching them with the country's regulations. And we had a back-office application to manage these categories and games.

There were many domain-based cross-functional teams, in which I was involved. My responsibilities were developing new features, maintaining the existing projects, and releasing them with automation.

### Beyn Technology

October 2018 - April 2019 / İstanbul --- Frontend Developer / Angular

Beyn Tech. is a company that develops games. We were developing a web application where users perform administrative operations.

### Gülenayva

August 2017 - October 2018 / İstanbul --- Frontend Developer / React

Gülenayva is a digital agency. I worked there as a junior front-end developer. I was responsible for creating web applications and mobile apps for corporate companies.

### Infotech

July 2013 - Jun 2016 / İstanbul

Not related to programming.

## EDUCATION

### Kocaeli University

2014

Geophysical Engineering

## Some active skills

Javascript, Typescript  
React, Vue, Angular  
Redux, React-Query  
React-Router  
Tailwindcss  
Scss, Styled Component  
NodeJS, Express  
Nextjs, Remix  
Docker, CI/CD  
Npm, Yarn, Monorepo  
Vite, Parcel, Webpack  
Eslint, Prettier  
Jest, Vitest  
React Testing library  
React Hook Form  
React-i18next  
Framer Motion  
Dnd-kit  
Git, Github, Gitlab, Azure

## Improving area

Docker, CI/CD  
Aws, Azure, Gcp  
Remix  
Prisma  
Postgresql  
Canvas
